ABOUT **US**

PERG technical services (LLC), a part of PERG group was established in the UAE in the year 2018 for the purpose of serving electro-mechanical / oil & gas industry in the field of real estate and construction sector.

With a team of dedicated, qualified and highly professional team of engineers, draftsmen, accountants as well as skilled and semi- skilled workers. Perg technical services (LLC) has specialized in carrying out various electro mechanical works involving intricate design, high standards and superior engineering skill. This has assisted the company to successfully evolve as an electro- mechanical company in a short span of time.

PERG technical services (LLC) is committed to the satisfaction of its clients "WITH NO COMPROMISE IN QUALITY OF MATERIAL AND WORK", and to put all its energy into the completion of the project on time. Our service starts with a thorough analysis and spans the complete cycle of the project, from implementation to comprehensive project management. With clear-cut objectives and well thought strategies for the completion and handing over of the project. The compliance to quality in installation and servicing has made us confident in achieving a quality system certificate in the near future.

Also the delivery schedule and project handing over schedules are met by pre planning and through proper co-ordination with the main contractor especially in long lead materials and critical activities of the project. Also Perg technical services (LLC) will provide (on request) weekly progress report to the main contractor and two week look ahead program to achieve the target on time.

Our company started off as a premier contractor for serving mechanical division. However, client demand for quality service that we, prompted the firm to expand to meet other MEP related needs. Today, it has a strong presence in diverse sectors with a client list among the top firms in Petroleum Distribution, Chemical, Process Industries, Energy, Construction, Electromechanical Companies, Hospitality and Military & Defence etc. The activities offered by us are shown in the illustration.

SOLUTIONS & **SERVICES**

- PLUMBING & SANITARY CONTRACTING
- ELECTRICAL ELV SYSTEM
- ELECTRICAL CONTRACTING
- FIRE FIGHTING SYSTEM
- HVAC SYSTEM

perg

BUSINESS **SEGMENTS**

MANUFACTURING

- Industrial Adhesives
- Closed Cell Nitrilie Foam Insulation System
- Water-Based Antifungal Adhesive Coating
- Resign Based Additives
- Noise Control Products
- Industrial silencer
- Accoustic enclosure

ENGINEERING & CONTRACTS

- Complete turnkey projects & solutions
- Plumbing & Sanitary Contracts
- Electrical Contracting
- HVAC Systems Contracting
- Fire-fighting Systems Installation
- Electrical ELV System Installation
- System Integration & Commissioning

CONSULTANCY

- Field electrical equipment testing
- Authority Approvals
- Energy Audit
- All Documentation for MEP System
- Engineering & Design Of MEP Systems
- Project Management
- Energy Management System

SUPPLY

- Electrical Component Supply
- MCCB
- ACB/VCB
- Power Cables
- Conrrol Cables
- Lighting
- Transformers
- DG Spares
- & More

CAPABILITIES & **COMPETENCIES**

Our company is proud to pronounce that we are the complete one stop solution for theservices that we provide to our customers. Our prolong experience and expertise make us enable to provide variety of services for the projects we undertake. Our range of services comes along with the greater value of assistance at all the stages of project.

Our technical experts can provide the most optimized model of project which incorporates the state of art technology & products. While doing all these expertise we always keep in mind the timeline and the budget constraints of your projects too.

Here are our key capabilities & competencies:

- TECHNICAL CONSULTANCY
- PROJECT DESIGN
- PROJECT ENGINEERING
- SUPPLY OF MATERIAL
- INTEGRATION OF PROJECT
- PROJECT MANAGEMENT
- AFTER SALES SUPPORT
- MAINTENANCE & FIELD SERVICES

TECHNICAL & CONSULTANCY

Consultancy's vision is to be the partner of choice for high value consultancy services to the our client projects & adding value by delivering innovative solutions, having a practical approach and utilizing the knowledge and experience of our people to solve our customer's issues. We offer advanced engineering and consulting services based on extensive experience and genuine know-how. Our application knowledge is utilized not only to identify possible upcoming problems, but maybe more important, opportunities for improvements.

PROJECT DESIGN

With expertise in technical consultancy we offer you design services for the specialized equipment or project. Our expertise in this will help you to choose the appropriate equipment & instruments to gain optimized design keeping the project budget to optimum level.

We keep in mind the various restriction and norms posed by the local authorities to execute such project. This keep the project design sized to fit the exact requirement of client as well as governing bodies/authorities to such projects. Our project design is inspired with the minimum/no harm to the environment and people working on it.

PROJECT ENGINEERING

Our project engineering expertise shall provide with the detailed engineering of the project which includes:

- Detailed Layout Drawing
- Project Planning & schedule
- Process & Instrumentation DiagramsDrawings
- Piping & Process Flow Diagrams
- Equipment Rating/Capacity Sizing

SUPPLY OF MATERIAL

We take care of complete selection & supply of material required in the project. We have numerous manufacturers and subcontractors registered with us to supply us specialized material and equipment for the projects we deal in. Our principals & subcontractor selection is based on their previous experience & quality of material they supply. Our experts in procurement and logistic operation handle the entire material procurement & logistic operation by co-coordinating with manufacturer of material, logistic operator and the client site to suit the project schedule agreed with client.

INTEGRATION OF PROJECT

Since we are designing a complete project we make sure that all the activities are going to synchronize the project at site. Our integration activity specifically refers to project related services where we are utilizing various equipment, controls & instrumentation to constitute a complete engineering project. Our experts in various disciplines evaluate the projects from various angles to make it an optimized and perfect to perform the desired results/activity.

PROJECT MANAGEMENT

Our project management experts offer a flexible and highly bespoke service based on a robust and well-proven formula for delivery. Working alongside our clients, we adopt a value-driven approach to defining and articulating business and project objectives before identifying the most effective means to deliver. We provide a full spectrum of project management services from the preparation of business cases and the development of organizational frameworks to straightforward procurement, design, construction delivery and operation. desired results/activity.

AFTER SALES SUPPORT

We are committed to providing lifelong pro-active support for the services & products supplied by us – beginning with the sale and installation of our systems and components and continuing throughout the life of your equipment/project. Parts, services and proper and detailed documentation are available with us all the time to shorten our response time which ultimately results into the less downtime of your project/plant. We have our associates in all over Middle East and North Africa to respond you with the best possible time and taking care of your call as soon as possible organizational frameworks to straightforward procurement, design, construction delivery and operation. desired results/activity.

Available support and services including:

- Installation and start-up
- Service and repair – factory / service center / or onboard

- Service contracts
- Troubleshooting assistance over the phone
- Engineering and technical sales assistance
- Upgrade and retrofit parts and programs
- Spare and replacement parts
- Tailored factory and on-board training
- On-board system and spares analysis

MAINTENANCE AND FIELD SERVICE

Since we have worked on numerous projects of various types of facilities, you can rest assured that we understand your specific needs for industrial maintenance. We offer a qualified, professional workforce combined with proven repair facility services and leading-edge technology. We understand that speed to market is a focus for you, and we cater our facility services to your schedule. We can also provide solutions to help curb escalating energy costs. We will maximize your facility service dollar and increase your operating efficiencies, making it easy for you to have a top-notch property.

Our national and diverse company footprint in Middle East allows us to offer you a wide range of industrial and manufacturing facility services, including:

- Fuel management & fuel oil systems
- Leak detection & monitoring system
- Compressed air piping systems
- Automation & instrumentation design for already
- installed system.
- Retrofit for fuel stations & fuel facilities. You can rely on our proven industrial maintenance practices to improve your facility, in many ways through
- Cost reductions
- Greater efficiencies
- Complete on-site management
- 100% customizable solutions

BUSINESS **PORTFOLIO**

Our Business activity extends to cover all areas (Please refer the project Execution chart under Section: 08 for details) of electromechanical works including but not limited to;

ENGINEERING & DOCUMENTATION

- Preparation of MEP Work Shop drawings & detailing
- Preparation of MEP builders Work and Coordination Shop drawings
- Preparation of MEP System Method Statements, ITP, Risk Assessments
- Preparation of O & M Manuals, As built drawings, Close out documents as per
- Client Standards

HVAC SYSTEM (Supply, Installation, Testing & Commissioning)

- Ducting (GI & Pre-insulated ducts) , Pipelines, Thermal Insulation
- Chilled Water Pipe (MS/ABS) installations, valve packing etc ..
- Stainless Steel Duct Works, Ecology unit Erection for industrial kitchens
- Supply and Installation of FCU, AHU, FAHU & Chillers
- Supply and installation of VRF System

ELECTRICAL SYSTEM (Supply, Installation, Testing & Commissioning)

- Electrical LV Switchgears, DB's, SMDB, Capacitor Banks
- Electrical Cabling, Wiring, Lighting, Dimming controls etc.
- Electrical L.V Networks, Earthing system and Lightening protection
- Structured cabling System (Voice & Data), Automation Cabling etc.
- CCTV System, Intruder Alarm System, Access Control System, Gate Barrier System,
- Public Address System etc.
- Fire Alarm , Central Battery , Voice Evacuation and Gas Alarm System

PLUMBING & SANITRAY SYSTEM (Supply, Installation, Testing & Commissioning)

- Water Supply (Pipe: PPR, PEX, Copper, Stainless Steel, HOPE SDR-11 & PVC High Pressure) & Drainage (Pipe: UPVC, HOPE Low Pressure & GAP) System.
- GAP Panel Type Water Tank, Water Transfer Pump, Booster pump, Circulation
- Pump & Sump Pump
- Solar Water System and Water Filtration System
- Hot Water Calorifier and Heater Chiller System
- Sanitary Wares, Mixers and its Accessories
- Manhole Covers, Gully Trap Sand Traps, Grease Trap, Petrol Interceptors etc.

AIR COMPRESSOR AND FIRE FIGHTING SYSTEM (Supply, Installation, Testing & Commissioning)

- Air Compressor (Pipe : API-5L / ASTM A 106 Grade 8 Sch-80 Carbon Steel Pipes) & Fire Fighting (Pipe: API-5L / ASTM A 106 Grade 8 Carbon Steel Pipes, ERW Pipes to ASTM A 53 & HOPE SDR-9) System
- Air Compressor (Rotary & Reciprocating Type), Air Drier System.
- Fire Fighting Pumps (Horizontal Split Case & Vertical Turbine Type)
- Clean Agent & Inert Gas System (FM-200, Novec-123 & HFC-227a)
- Fire Fighting Accessories like hose reels, Sprinklers, Zone Control Valves Pressure reducing valve Stations and Alarm Check valves
- Holiday/Pin hole testing for Compressed Piping System

ELV & TELECOM SYSTEMS (Supply, Installation, Testing & Commissioning)

- Designing, drawings, Approvals from Authorities, procurement , Installation and
- Commissioning , Training and Maintenance of ELV systems
- Telecom Systems, Access Control, CCTV,MATV/SMATV, Intercom System, Public Address/ BGM system, Room Control System, Lighting control System, Gas Alarm System, Access Control System, Audio Video Intercom System and complete networking systems

QUALITY **POLICY**

Providing suitable resources to implement and maintain the Quality Management System Employment of suitably qualified, skilled and experienced tradesmen Educating and training in order to continually improve the skills of our staff Ensuring that we fully identify and conform to the needs of our customers Looking at our service provision processes, identifying the potential for errors and taking the necessary action to eliminate them Monitoring and evaluating the quality performance of consultants, subcontractors and suppliers and implementing effective communication with them on quality and compliance issues.

We are all committed to operating continuously in line with international standards (i.e. ISO 9001) and we will maintain the necessary Quality Approvals consistent with our customer requirements. Our company will constantly review and improve on our services to ensure tasks are completed in the most cost effective and timely manner for the benefit of all our customers.

Our company is committed to implementing proven Quality Management System to enable the delivery of workmanship and service to the highest standard. The goal of our company is to achieve a high level of customer satisfaction at all times. The organization believes in the concept of client and supplier working together in pursuing this policy and in continually striving for improvements in service quality. The objectives of this program are to: Complying with statutory obligations, standards, specifications and codes of practice relevant to quality management om Planning and management of domestic projects Maintaining monitoring, reviewing and continually improving the Quality Management System consistent with ISO 9001

SAFETY **STATEMENT**

"Safety is the first priority" and no compromise with safety, that is our company policy. Company safety department has developed and in-house "Safety Manual which describes the essential safety practices to be followed by every company individual. Company has its own safety and loss prevention department, which is controlled by the Safety officer of the company. It is his direct responsibility to develop new safety standards and implementation of safety practices among the company people. Implemtation of safety practices is also the responsibility of every individual working in the company.

Following the good safety practices creates safe working environments. Delegated Safety Engineers will conduct "Safety refreshing seminar" on regular intervals. Hazard identification will be prepared, reviewed and approved prior to commencing any activity. The copy will be distributed among the craft people who are involved that particular works. It is mandatory that all the employees working in the company must be attend a "Safety Awareness Course" which conducted by the company safety department. Safety inspection will be conducted for every equipment and machinery and it can be put in service only after obtaining the approval.

HEALTH, SAFETY & **ENVIRONMENT POLICY**

Our company considers the surrounding environment and safety of its employees a major part o their responsibility and to properly discharge this responsibility, our main goal is to achieve a Zero accident in all projects of the company. Our company shall establish Environmental and Health Safety objectives and targets, implement programs to achieve these and continually measure and monitor its activities and progress against the committed objects. The company is concerned with occurrence of accident, which are primary failure in the company's operational procedures and as such are costly. It is imperative that each employee is fully aware of the company's policy with respect to the prevention of accidents and environment friendliness.

The following protection policy has been established:

The company, its management and supervisors will use only safe operational procedures and develop safe working attitude and habits. Any employee of the company who continually works in unsafe manner and does not follow safe operating procedures will be imposed to strict measures against him for his own benefit and the benefit of others. To eliminate the waste of resources so as to conserve the environment and make the best use of available resources. To utilize every opportunity to recycle the resources. To implement an effective waste management procedure the company shall provide resources and endeavor to lead, motivate and encourage prevention principals and environmental stewardship ethics.

It is everyone responsibility to assure the job is accomplished in as safe and environment friendly manner as possible. Individuals are responsible for promoting safe operations. Due care and attention will be given to property, equipment and environment areas. Our company views integrated accident prevention and safety program as prime importance on each of the Company has designed this safety program with set standards, procedures and guidelines following the regional laws and all the important safety and environmental standards (i.e. OHSAS 18001, ISO 14001) currently followed widely. Our company is committed to continually improve its Environmental performance and to communicate result with all stakeholders in order to maintain a relationship based on honesty, openness and mutual trust.

BUSINESS **APPROACH**

PERG Technical Services LLC is committed to building longterm relationships based on integrity, performance, value, and client satisfaction. We will continue to meet the changing needs of our clients with our quality services delivered by the most qualified people and reputed materials for installation.

PERG Technical Services LLC is not just an Electromechanical Contracting company. We are a dedicated team striving to bring growth to our community, helping to maintain existing companies and assist our clients in making their dreams become a reality.

Inspiration: We are motivated by a deep sense of purpose, encouraging ourselves and each other to create an impact for the greater good.

Integrity: We do what we promise, acting in accordance with the highest professional and ethical standards to supply & execute projects with value

Accountability: We take responsibility for our actions and strive to be humble, transparent and efficient in every project & service that we offer

Partnership: We work hand-in-hand together in the spirit of inclusion, supporting each other while growing as specialized service contractor.
